Irish Knots -26' Parker 2520xl

**Captain  
Chris Yard**

I am licensed to run my charter business out of a fully insured, Sport 175 Alumacraft. This 2007 Dominator model is powered by a 115 Evinrude Outboard and trolls the shallows with a quiet and powerful MinnKota electric motor. This vessel, "Lil Knots", can accommodate up to 3 paying customers. It is sponsored and fully equipped with the best fishing systems in the business by Traxstech Corporation. It is a well-designed, well-laid-out fishing machine, outfitted with some of the best fishing products and safety gear made for the Fishery.

Aboard the Lil Knots, it is my goal to give you a safe, enjoyable fish-catching experience. Bring your family (we are child friendly), friends, and business partners, and come enjoy some of the most impressive sights one can see from the water!
